

TO SUCCEED CRAWFORD

Dr. Gordon Moore, of Furman University, is Selected.

HE IS LIKELY TO ACCEPT

A Man of Great Ability Who Will Be of the Greatest Assistance to the Virginia Anti-Saloon League.

At a meeting of the Executive Committee, held here yesterday afternoon in the parlors of the Young Men's Christian Association, the Rev. Gordon B. Moore, D. D., professor of philosophy in Furman University, and one of the most distinguished ministers in the South, was unanimously chosen to succeed the Rev. C. H. Crawford to the position of superintendent of the Anti-Saloon League of Virginia.

The election of Dr. Moore and the additional news that he will, in all probability, accept the call and take up the work here in a very few days will be hailed with delight by the temperance forces throughout the State. The new superintendent is a man of wide learning and experience, and is known throughout the denomination for his ability as a preacher. He will edit the Christian Federation, the organ of the league, and as the committee announces below, will make it a "live wire."

As previously stated, the Rev. J. W. West, field secretary of the league, will continue in the work. He has made great progress thus far, and the committee is much pleased with him.

THE ANNOUNCEMENT. After the meeting of the committee yesterday the following formal announcement was issued:

Dr. Gordon B. Moore was unanimously elected superintendent of the Anti-Saloon

DR. GORDON B. MOORE, Chosen Superintendent of Anti-Saloon League.

League at the meeting of the Executive Committee yesterday. Dr. Moore is a Virginia native, and is related to many of the most influential families in the State. He is an alumnus of Richmond College and of the University of Chicago. For some years he has held the chair of philosophy in Furman University, at Greenville, S. C. He is a man of strong personality, conservative and resolute.

Dr. Moore has long been a student of social problems, and brings to this important work just the equipment in training and ability that is most needed. He is a forceful speaker, and in the pulpit and platform will present the temperance cause in an acceptable and effective manner.

BE A LIVE WIRE. As the editor of the "Christian Federation," the organ of the Anti-Saloon League, he will put power into that helpful agency in moulding public sentiment. Under his control that paper will command the attention of the most thoughtful people in Virginia and the South. Through it Dr. Moore proposes to set forth from time to time his matured views as to many of the social problems in their relation to the saloon. The Christian Federation will be a live wire; for Dr. Moore is known to state his convictions in a manner to impress all. Mr. J. W. West, the field secretary, is carrying forward his work for the league with characteristic energy and patience. He has shown great fitness for the demands of this expanding movement. With the combined energies and wisdom of two such men as Dr. Moore and Mr. West, the outlook for the Anti-Saloon League is indeed bright. The growth of temperance sentiment in Virginia has been steady, is spontaneous and wide-spread. There is nothing spasmodic in its present efforts. The people of Virginia seem to have made up their minds once for all that the time has come when the best interests of the State demand that the

THE POSTMASTER

Shook Off Coffee and Got Well.

It is so easy to shake off coffee and coffee-diseases when well made Postum Cereal Food Coffee is served in its place, that it doesn't take long to tell the tale. The postmaster of a flourishing town in Dinwiddie county, Va., writes: "Up to a short time ago I suffered from a great sufferer from constipation, nervousness and indigestion. About the middle of last July I quit coffee and began using Postum, and ever since I have been improving. My troubles have now quite disappeared. "I attribute my recovery to Postum, and have induced several of my friends to try it. You are at liberty to use this." Name given by Postum Cereal Company, Ltd., Battle Creek, Mich. "There is a reason. Coffee is a definite poison to many persons, and disease sets in if the use of even one cup a day is continued. "When the poison is withdrawn and a pure food beverage like Postum Food Coffee used, the return to health is natural, advanced, and many, very many old chronic diseases disappear when the coffee is abandoned and Postum used in its stead. Many of these old diseases are hidden nervous disorders, that coffee keeps the nerves poisoned, and that constipation creates and holds disease in some organ of the body. Take away the cause and give a true, natural nerve re-builder like Postum and the change is often marvelous."

MITCHELL TRYING TO FORCE ORGANIZATION

(By Associated Press.) CHICAGO, ILL., February 25.—John Mitchell, president of the United Mine Workers of America, has abandoned all hope of organizing the miners of Maryland and West Virginia without outside assistance that will bring strong pressure upon the operators that they will consent to unionize their own mines in self-defense.

To that end a movement was started to-day in Chicago to protest against the awarding of public contracts to firms having connections with the West Virginia coal, and this movement is to spread all over the United States, wherever labor is organized. The Teamsters' Unions have entered into a compact with the miners to tie up the output of the boycotted mines, and they will refuse to deliver it on any public contract.

A committee, headed by President Gompers, of the American Federation of Labor, called on Mayor Harrison to-day and notified him that contracts for West Virginia or Maryland coal are awarded, the teamsters will refuse to deliver it. Mayor Harrison promised to submit the bids for coal to the committee.

A \$1,000,000 HITCHING POST. BATH, N. Y., February 25.—J. B. Poston has in front of his house what he calls a million-dollar hitching post. It is a white oak post, and was removed from a field near Canisteo, Steuben county, N. Y., and is believed to be the last of thousands of posts that were driven for a distance of more than 100 miles on the route of the New York and Erie Railroad when it was being constructed through the Susquehanna, Canisteo and Allegheny valleys, sixty-two years ago.

It was intended to elevate the rails for the railroad on these posts instead of laying them on a solid roadbed. This plan of railroad building was abandoned before a rail was put down. The money spent in the useless work amounted to more than \$1,000,000, and drove the Erie into its first bankruptcy.
